

**Tender Items Governed by Municipal-Oriented Specifications**

**SECTION GC 1.0 — - INTERPRETATION**

**GC 1.04 Ontario Provincial Standards**

Subsection GC 1.04 of OPSS 100 is amended by the addition of the following paragraph:

.0708 The municipal-oriented Ontario Provincial Standard specifications applicable to the tender items for this Contract are detailed in the following table. In the case where a provincial-oriented specification(s) also applies to a tender item listed in the table, the Material and work covered by each specification will be specified in the Contract Documents.

[\* Designer Fill-In for Table Below, See Notes to Designer]

<b>Tender Item Number</b>	<b>Tender Item Title</b>	<b>Construction Specification Number and Date (OPSS.MUNI)</b>	<b>Referenced Construction and Material Specifications Number and Date (OPSS.MUNI)</b>
<u>*</u> <u>-</u>	<u>*</u> <u>-</u>	<u>*</u> <u>-</u>	<u>*</u> <u>-</u>

**NOTES TO DESIGNER:**

\*

Fill in table with tender items and OPSS.MUNI specifications listed as per the following guidelines:

1. Some MTO Contracts may have items that are governed by municipal-oriented OPS specifications. For example, traffic signals and lighting systems at the end of freeway ramps may be governed by municipal-oriented OPS material specifications when the municipality agrees to be responsible for maintenance after the warranty period. Common and provincial-oriented specifications are listed in the schedule of the tender for MTO Contracts, but municipal-oriented OPS specifications are not listed there.

For each item covered in whole or in part by a municipal-oriented OPS specification(s), fill in the table as specified below:

Column 1: The item number of the tender item as designated in the tender e.g., 68.

Column 2: The tender item title as it appears against the tender item number in the Tender e.g., Concrete Poles.

Column 3: The OPSS.MUNI construction specification number and date that covers the work for the tender item e.g., 904 dated January 2012. Enter "Not Applicable" if the tender item is governed by a common or provincial-oriented specification and there is a municipal-oriented material specification that applies.

Column 4: The number and date of all municipal-oriented construction and material specifications that are referenced by the construction specification. Enter "Not Applicable" if there are no referenced municipal-oriented specifications. Do not list the common and provincial-oriented OPS specifications since these are in the list of referenced specifications in the tender.

2. When the work or material for a single tender item is covered by a municipal-oriented and a provincial-oriented specification, the quantity sheets in the Contract Drawings, a non-standard Special Provision or a modified version of this Special Provision may be used to detail the locations of the parts of the material and work that are covered by each specification.

WARRANT: All contracts with tender item(s) that are governed in whole or in part by a municipal-oriented OPS construction and/or material specification.
